About DHS FirstSource II Information Technology Commodities & Solutions Contract

The DHS FirstSource II Contract offers DHS-wide Components, Offices and Divisions supporting Homeland Security initiatives the ability to easily and quickly procure IT commodity purchases that ultimately support the strategic goals and strengthen the mission readiness of DHS. Through FirstSource II, the DHS community can procure commodity purchases for IT security, information sharing, IT transparency, and workforce development, including:

- Biometrics
- Desktops
- Laptops
- Ultrabooks
- Tablets
- Virtual Desktop Infrastructure
- Routers
- Switches
- Servers
- Blade Servers
- Storage Area Networks
- Security Appliances
- Racks/Enclosures
- Mass Storage
- UPS
- Telecommunication Equipment
- Video Teleconferencing
- IT Peripherals
- Printers and Imaging

Who We Are

Our consortium of joint venture partnerships is an agile and responsive team that has extensive, solid experience with DHS and its components, and a consistent record of exceptional customer satisfaction. We have proven success in providing IT products and services that improve processes, lower costs, and contribute to mission success, to government customers nationwide. Though small businesses, we offer a large company resume and have the strategic fulfillment and financial capabilities to supply DHS components with all required products and services. We are backed by seasoned executives who have worked together and managed multi-million dollar federal programs—including FirstSource.

We have existing and established manufacturing and distributor relationships, including access to a 140,000 sq. ft. facility next to FedEx's Memphis hub. With these longstanding relationships and the volume discounts our team currently receives, we offer the DHS community IT commodities that are competitively priced.

Our Solutions

Servers & Storage

Enterprise-wide and mission-critical storage solutions, such as the HP 3PAR world-class storage products, provide the most resilient and controllable storage solutions available.

Big Data Analytics

We provide an analytic data tool that illuminates the connections across vast amounts of data, speeding the time to isolate and analyze correlations in data. It quickly uncovers key insights from a wide range of data that might otherwise be unknown.

Virtualized Desktop Infrastructure

For organizations looking to enhance security and simplified maintenance of their desktop infrastructure, VDI is the answer. Advantages include: improved software and hardware management; centralization of security, storage, and management; increased availability and reduced desktop downtime; and more.

Mobility

Your mobile workforce needs access to its applications at a moment's notice, whether moving around parts of an office or the world. They need something versatile—we can help.

Network Solutions

The evolution of applications, mobile devices, and compute environments is straining current networks. Network architectures must become dynamic, agile, and simple. Our HP and Avaya Networking Solutions deliver increased agility and security at a lower price point.

Visual Communications

141" diagonal size, 5mm thin bezel, VOE, and DisplayPort daisy-chaining.

Comprehensive display solutions

We can assist in the design and deployment of campus or building-wide digital signage, way-finding, emergency notification/egress signage, internal signage networks, and digital menu boards

Application Lifecycle Management

HP Application Lifecycle Management (HP ALM) is a set of software products designed for accelerating the delivery of secure, reliable modern applications. It is a combination of a common platform, several key applications and a dashboard targeted at managing the core lifecycle of applications. HP Application Lifecycle Management delivers requirements management, test planning and functional testing, performance testing (when used with HP Performance Center), developer management (environments such as Collabnet, TeamForge and Microsoft Visual Studio) and defect management.
